Follow Initial Protocol for All Patients

Place patient in position of comfort, only if it is safe for transport

Consider **A2. Analgesic**

Consider **A7. Nausea/Vomiting**

**BLS**

**ALS**

**Interfacility**

---

### Special Considerations

- If associated with back and/or chest pain consider abdominal aortic aneurysm; pulsatile abdominal mass, unequal femoral or pedal pulses
- If abdominal aortic aneurysm is suspected transport to trauma center
- Check/ask about bloody stools, ability to pass gas, possibility of pregnancy, fever
